– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
 Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2837

1. Claims 8 and 18 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 8 is alternative, claim 8 discloses abnormality detecting method or abnormality detecting program, and not proper dependent claim since claim 8 depends on claim 1 which is an apparatus claim not method or program. Also claim 18 is not proper dependent claim does not limit claim 15.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 200202779 as cited by applicant in view of Moriya et al.

JP 200202779 discloses inverter system for driving polyphase motor comprising ac motor which is driven by an inverter for outputting drive force or generating power, power supply connected to a neutral point of the ac motor and neutral point state detecting means for detecting a state of current or voltage at the neutral point, wherein abnormality determination is performed based on the detection result of the neutral point state detecting means, see #30,#22,#32,#40,#58 and abstract. JP200202779 lacks disclosing auxiliary device. Moriya et al discloses auxiliary device ,see fig 1 #26.

IT would have been obvious to one of ordinary skill in the art to combine the inverter system of JP 200202779 with auxiliary device of Moriya et al for improved control.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishikawa et al discloses auxiliary device and motor.
